

Fighting Auto Theft with Detective Phil Ens

Retired Vancouver Police Detective Phil Ens will walk you through the latest in auto and marine theft techniques from shaved keys, changing VIN/HIN to how the internet is being used to manipulate individuals and corporations alike out of their property. Det. Ens was an auto theft investigator for more than 24 years and is a court recognized expert. He has spoken across North America on this subject.

TIME:

December 2, 2021 – 1300-1600

December 3, 2021 - 0900-1200

TOPICS COVERED

1. Current Auto Theft Methods

Learn about shaved keys and ignition compromising techniques, catalytic converter thefts, cloning of keyless entries and how receivers can be used to steal transponder information.

2. Tools and Techniques

Information about the current auto theft trends, new prevention tactics, GPS, RFID tracking, cameras, and "Bait Property".

3. Marine Theft

Discuss today's theft issues from boats, PWC's and motors. Learn how to locate the secondary HIN, how the re-HINing of stolen watercraft is done and how to deal with Transport Canada regarding their registration abilities.

4. Auto Theft and the Internet

Examine a case study on how criminals sold stolen car parts online from over 20 high end automobiles. Learn how the "Bait and Switch" was used to obtain these cars and how parts from six of them were used to build one of the suspect's vehicles.

5. The Auto Wrecker Atrocity

Walkthrough of the investigation of a corrupt auto wrecker including the disposal methods of stolen and fraudulently obtained cars.
